## Introduction

A changed life style is a an illusive dream sought by many but experienced by few. Health, Time and Money in the correct balance will produce an ideal life style.

Many people have one or more of these important **health, time and money factors unbalanced.** As a result **they have a life but not much style.**

For example, **some have money** but due to **working long hours** lack the time to enjoy a balanced **lifestyle and to do all they want to do.** Others are **victims of corporate down-sizing or forced retirement.** This creates an abundance of time but delivers **insufficient dollars to enjoy a balanced lifestyle.**

**Some people have discovered a way to improve their life style. *You can too.***

This presentation briefly outlines a way **you** can earn an **increased income, improve your health, gain freedom from your current occupation** and stop living a life achieving other peoples objectives.

## • Health!                      What's the problem?

Your body's being invaded.

**Ultraviolet rays** from the sun. Just think, you must defend your body from the sun's damaging rays- Or else ,Skin Cancer! Sunburn! Eye Damage!

**Stress** invades the mind. Work pressures! Family pressures! Money pressures! Doctors say stress is the cause of many serious health problems. You can set up a defence against stress.

**Pollution.** Invasion of your body, possibly the worst of all. In the air you breathe, in your food, in your water. It's all around you. But, you can arrange a defence.

**Ever thought why** in 1900 only 1 in 80 people got cancer but now it's 1 in 3. Where did Alzheimer's disease come from, almost unheard of 80 years ago. Diabetes, asthma, arthritis, heart disease, all on the increase ,ever thought why?

## • Food!                      Is it enough?

That's a good question!

U.S.A Senate Document 264 in 1936 said at that time the soil in most parts of the U.S.A. lacked many of the vital minerals required to maintain good health in the population. The following is an extract from Document 264.....

“It is horrific to learn from our leading authorities that 99% of the American people are deficient in these minerals, and that a marked deficiency in any one of the more important minerals actually results in disease.

Any upset of the balance, any considerable lack of a single element (mineral), however minute the body requirement might be, we sicken, suffer and shorten our lives”.

That was 65 years ago and the situation here is no better and possibly worse.

So we are being invaded by chemicals and pollution, our food is insufficient for good health any wonder we are sick and tired of being sick and tired!

## • Money!                      Making ends meet!

Have you ever heard this before?.....

“Get a good education - get a good job - get a good income and be set for life! Retire with a good superannuation payment.” Yes that’s what most of us were told, but the reality is that most people retire on a 3<sup>rd</sup> of what they couldn’t manage on when they were working.

Or the alternative, a conventional business of your own, complete with staff, overdraft, large mortgage, long hours, low pay, stress, and risk.

Can *you* work enough hours to earn what you want? Perhaps your income is good but you have no spare time for your family or the things you want to do! Maybe stress is causing some concern or you’re sick of the same old routine. What about that retirement income? will it be large enough?

**There is an answer to all the things you’ve read so far - it’s the part time opportunity we offer - and it’s legal, moral, ethical and *different*.** The rewards are good, and we’ll get into that a little later.

## • Freedom!                      Time to choose.

## • The Solution! Your choice.

The choices are for you to make. But consider this first.

If you continue to do all the things you've been doing in the last 5 years will you get the life style you want in the next 5 years. Will your job provide all the money you need to do all the things you want to do. Will you have sufficient time to do all the things you want to do. Or like many people will you still be sick and tired of being sick and tired.

If you continue to do the things you've always done you're likely to get the same as you have always got. Because, if nothing changes, nothing changes.

If you're ready to make a change so you can begin enjoying a better life style starting in less than 12 months, please consider your options!!

- Your products for free or \$200.00 per month.
- \$2000.00 per month plus a car.
- \$10,000.00 per month plus a car.

The choice is yours. Please phone the person who gave you the business card or send an e mail. To do so click on contact and remember to enter the ID number on the business card or the name of the person who made contact with you initially.

Thanks for taking the time to get this far, we all hope you have every success in your search for a better life style.
